Summary

An energetic, creative, and open-minded ICT engineering student at the National Engineering School of Tunis, passionate about data science and artificial intelligence. Driven by curiosity and problem-solving, with a strong desire to turn data into meaningful insights and innovative solutions through analytical and logical thinking.

Education

National Engineering School of Tunis (ENIT) — *Sep 2025 - Present*
Master's Degree in Information Processing Technology

National Engineering School of Tunis (ENIT) — *Sep 2023 - Present*
National Engineering Degree in Telecommunications - Specialization in Data Science

Preparatory Institute for Engineering Studies of Tunis (IPEIT) — *Sep 2021 - Jun 2023*
Pre-Engineering Studies - Physics and Chemistry Section

Experience

Software & AI Engineering Intern — *Jun 2025 – Aug 2025*
Talan Consulting

- Developed full-stack intelligent log analysis platform with automated parsing, anomaly detection, and correction recommendation.
- Integrated generative AI and RAG techniques using Spring Boot backend and Next.js frontend.

Research Intern (PFA2) - Deep Learning for EEG Classification — *Oct 2024 – Apr 2025*
RISC Laboratory, ENIT

- Conducted comparative study of deep learning models (ANN, CNN, CNN-LSTM) for epileptic patient classification from EEG signals.
- Developed Streamlit interface for real-time EEG classification supporting clinical decision-making.

Projects

Epileptic Seizure Prediction *(Deep Learning / Signal Processing)* : Developed a deep learning pipeline to predict epileptic seizures from multi-channel EEG signals using the TUH EEG Seizure Corpus.

Credit Line Adjuster using Reinforcement Learning *(RL / Finance)* : Q-Learning agent for dynamic credit line adjustment with interactive dashboard for performance visualization.

IEEE CIS Challenge - "ZEN Virtual Dressing" *(GANs)* : 3D avatar generation using Conditional GANs and Poisson reconstruction.

IEEE EMBS Challenge - "AI for Mental Health" *(AI / NLP / Speech Analysis)* : Created dual AI models for adolescent depression detection a CNN trained on speech spectrograms and an NLP model analyzing Twitter text data for emotional patterns.

Technical Skills

Programming Languages:	Python, C, C++, C#, Java, Arduino, PL/SQL	**Web Development:**	HTML/CSS, JavaScript, TypeScript
Frameworks:	.NET, Spring Boot, Next.js, Streamlit	**Data Analysis & ML:**	NumPy, Pandas, Scikit-learn, TensorFlow, PyTorch, OpenCV
Databases:	MySQL, PostgreSQL, SQLite3	**Others:**	Docker, CI/CD, Git, GitHub, Linux Administration

Languages

Arabic:	Native	**English:**	B2
French:	B2	**German:**	A2

Associative Life

Vice President, IEEE ENIT Student Branch (2025) - **Treasurer** IEEE ENIT Student Branch (2024) -
Vice Chair, IEEE WIE Annual Congress of Tunisia 4.0 - **Project Manager**, Tunisia Engineering Day 7.0 (2024)
